Our library is the biggest of these that have literally hundreds of thousands of different products represented.

## Book Descriptions:

# brookstone digital photo keychain manual

The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of uninsulated "dangerous voltage". Do not use while bathing or in a shower. Do not place or store unit where it can fall or be pulled into a tub or sink. Do not place in or drop into water or other liquid. Charging time for the keychain is approximately 23 hours and provides up to 2 hours of viewing time. Using the PhotoViewer software, browse your computer for photos. Click on the chosen photo file in the list of photos, and it will appear in the large PhotoViewer window see example at right for all tool locations. Press the buttons to browse through your photos. The number of the photo will appear in the top right hand corner of the screen. Press the button to for 3 seconds turn the keychain off. Use the buttons to highlight CLOCK and press the to enter the Clock Menu. From this menu, use the buttons to highlight SET CLOCK and press the button to select. Use the buttons to highlight CLOCK and press the button to enter the Clock Menu. Use the buttons to highlight either Digital or Analog and press button to view your choice. Use the buttons to highlight BACKLIGHT and press button to select. Use the buttons to choose between 1 and 9 1 being the lowest light setting and 9 being the highest light setting. 4. If a defect arises and a valid claim is received within the Warranty Period, at its option, Brookstone will either 1 repair the defect at no charge, using new or refurbished replacement parts, or 2 replace the product with a new product that is at least functionally equivalent to the original product, or 3 provide a store credit in the amount of the purchase price of the original product. Any returned computer that is damaged through customer misuse, is missing parts, or is in unsellable condition due to customer tampering will result in the customer being charged a higher restocking fee based on the condition of the product. Amazon.com will not accept returns of any desktop or notebook computer more than 30 days after you receive the shipment. New, used, and refurbished products purchased from Marketplace vendors are subject to the returns policy of the individual vendor. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. RAF 3.0 out of 5 stars They arrived promptly and all worked. I give this product less than 5 stars because of the cumbersome software included, which is necessary to load the digital pictures onto the unit itself. In addition, the resolution, while barely adequate, is much less than I expected. I haven't been able to find any specs as to the number of pixels. Ill guess 160 x 160. Tips for best use of this software Any disconnect of the keychain device before, during and after downloading will immediately kill the program, so be sure to save your working pictures at regular intervals. Save your work before downloading, as the program will clear

the working buffers without giving you the opportunity to save it a problem if you want to retain your edits. The resolution of this display is extremely small, so use their software to crop as much out of the picture as you can before saving it to the work area. The cropping forces the same width to length constraints regardless of the size of the cropping. Portrait-oriented images require the most creative use of the crop tool. <http://www.harasim.cz/uploaded/cummins-engine-assembly-manual.xml>

The brightness and contrast change options are adequate, but I recommend that you do as much as possible with your cameras postprocessing software before using the Brookstone supplied software. She loves it. She puts pictures of everything she wants to show off and takes it with her. We both are pleased with the quality of the product. The price is very reasonable. I would buy this again and again. GRAINY display. The software is so so easy to navigate, but very limited photoediting capability. My main criticism is the screen resolution is terrible. Its very grainy, like the first digital camera I bought in 1996. With todays amazing advances in miniaturization of memory and displays, this device should have crystalclear photos, not blurry ones. All in all, ALMOST a terrific product, and still a good product if you dont mind the grainy display. This device doesnt work. The manufacturer really needs to get on the ball and resolve these issues. The installation program keeps looking for drivers that are not on my system. I found several missing files by searching the internet but it was an excessive amount of work. The program still does not function correctly and causes our computer to crash. My wife is in tears, this was a Christmas gift from her sister. When I would use the software to download pictures to the device, the software would often just terminate and Id find myself back at my Windows desktop screen. It doesnt happen on all photo folders and I cant understand why it does it on some folders, but not others. Brookstone has no real support for the software either. Took me hours to download 60 pictures to the device. It sure seems like a neat idea to give someone, but Ill never know because I have a Mac. Really odd that the company does not support a Mac compatible download to fix this oversight. I only hope my sister likes it. The My Life Digital Photo Keychain by Brookstone, for example, holds up to 100 photographs.

Step 1 Insert one end of the USB cable into the keychain and the other end into your computer to charge the battery for two to three hours, or until the battery is fully charged. Once charged, the digital photo keychain will operate for approximately two hours prior to needing a recharge. An onscreen battery indicator will notify you when the battery power is getting low. On the initial connection, the PhotoViewer software will be automatically downloaded to your computers hard drive so that you can download pictures to your digital keychain. Youll also have the ability to use the software to view and edit pictures. Step 3 Use the PhotoViewer software to browse your computers photo library and add pictures to your digital keychain. Prior to adding each picture, youll have the option to magnify or decrease the sizes of the photos, crop or rotate photos. Once your satisfied, the photos can be saved by clicking on the arrow button. Synchronize your digital keychain by clicking on the synchronize button in the PhotoViewer control panel. This will download all of your pictures to your digital keychain. Burbeck holds a B.A. in journalism and political science. She left town and now Im stuck with a digital keychain that has pictures of a baby which is not mine and a flower. Did I mention it makes me feel creepy. I want to get my pictures on there. I googled and googled and cannot get a driver, download, software, freeware. Nothing will help my PC read this keychain. Brookstone Digital Photo Keychain Manual So, any help pointing me in the right direction. Anyone have this problem or have the keychain Ill GLADLY provide my email address if someone feels like sharing. Please, dont make me keep being the creepy guy with pictures that arent his for display on a keychain. I purchased the same 1.1 Photo Viewer. I do have the disk but even after installing the software, my PC does not recognize the viewer once I connect it to the USB. I went to the website and installed the driver called Vista.exe, however, when I go to run it, it gives me an error the one where it asks to you send an error report and then it does nothing. Trying to run the Photo Viewer software needed to place pictures on the key chain, it says that it cannot connect to the device. Command line abbreviations for mac. I assume this is because my computer does not recognize it yet.

<https://dhomeotravel.com/images/compaq-presario-2800-manual-pdf.pdf>

I even tried adding hardware through my Control Panel, but it states that the device is working fine although it still does not recognize it. I am confused as to why the disk does not install the driver and then why the Vista.exe does not work. For the record, I run XP, but the driver download is the same for 98, XP, and Vista. Digital Photo Keychain Driver I was doing a search because I have the same problem as this unfortunate fella. I have creepy pictures too. I threw out the box presumably there was a cd in it with the driver. Yes, Im an idiot, but I tried the download for Windows from that site, and no worky. Everytime I try it, I get the blah blah had to shut down, do you want to send Microsoft an error report. The company is from china, there is no north american number to call, and no tech support. Anyone have a copy of the file that works. Or know where I could find one. Not exactly a customer service oriented company, thats for sure. I decided to go buy one for the cd. Its completely returnable packaging and nobody will know the difference. Even the cd package is easily opened and resealable. Anyway, I encountered the same problem when trying to install new hardware, when it went to install the drivers, it came up with an error. I tried both options it gives and neither worked. However, I decided to just run the setup.exe file on the disk and it installs a photo viewer program, which works. it interfaces with the keychain and you can add and remove photos from there. Very often issues with Brookstone Digital Photo Frame begin only after the warranty period ends and you may want to find how to repair it or just do some service work. Even oftener it is hard to remember what does each function in Digital Photo Frame Brookstone Digital Photo Frame is responsible for and what options to choose for expected result. Fortunately you can find all manuals for Digital Photo Frame on our side using links below. Activate Face Zoom Feature. Select Slide Show Photo Order.

Hopefully one of my readers will win this awesome prize. Could you tell me stepbystep, starting with how to open viewfinder, then how to set it up with photos thank you. Reply KatBp says 26 March, 2020 at 744 pm I'm sorry, this was a giveaway that was a long time ago. I was just helping share it. I would reach out to the company to find out. Reply Leave a Reply Cancel reply Your email address will not be published. I also have a husband who I've been married to for 11 years. I enjoy cooking, traveling, taking photos, writing and spending time with my family. Week 5Teen Titans Go! Vs. Teen Titans Character Banks Unicorn Roundup Camp Warner Bros. By using this website you agree to our Cookies Policy. Learn more. Was told an envelope would be sent out to place on box it has been over two weeks all I have is a defective product. Verry poor customer service and aparently poor merchandise as listed by the recnt coments on this particular product.This is the ONLY reason why she went ahead and bought it for me. Im never shopping Brookstone again. Also, honestly, aside from their tempurpedic stuff.Sure they should optimize and resize but I think in all honesty youre better off including a free PhotoEdit software and have mac users rely on iPhoto than this.

BTW Apple does tell you not to EVER insert a minicd, that said there should also be a BIG BIG warning on the disk itself.You people with your small claims court and Credit card disputes, Good Luck. If you signed that receipt its yours. It Is Your Responsibility As A Consumer To Ask About The Return Policy. Keep Your Receipts and Ask Questions. If you were smart you would have just bought ear plugs.To Gregory John Allen You are a dumbass. Dont ever force anything into a CD drive. If it doesnt want to go, DONT MAKE IT. Mac users need to just plug the USB cord connected into the keychain on the other end into their Mac and that will automatically install the software. Dont blame Brookstone for your dumbass mistake. To Ed The back of your receipt clearly states Brookstones return policy. Did you use cash and want cash back. In that case they can send you a Mail Check. Im sure you blatantly refused this offer, though, since you seem like an ignorant dude anyways. If you didnt have your ID or you credit card you purchased your keychain with, then it would be impossible to put the refund back on your card, hence the store credit. Whats the big problemAhora no puedo usar lo que compre!! y no se de donde puedo bajar el sowftware para usarlo!!!I called Brookstone direct, but they did not have a tech person and the customer service department could not tell me whats wrong. I have tried everything so I have decided to just return item for a refund. Photo keychain is a great idea, but only if it works.The problem I am having is the software will not load. I

have Windows Vista and Brookstone rep sent me to brookstone manuals and I have tried both of them but none of them will open. The keychain I have is black and she said that it is discontinued even though I only purchased it as a Christmas gift in November. They were most unhelpful and said without receipt that basically it is tough luck.

I also tried the tao downloads software which just says that the keychain is not responding and to try different post. This does not work either. So basically it would appear I am stuck with a photo keychain that does not function and Brookstone dont appear to care less. Any help or advice would be appreciated. And this circumstance isnt special, you were unprepared. You chose to get a new product. Why should they take the fall. I save the boxes to expensive items or items that I may wish to return. I also received my key chain as a gift friend had no use for it so she gave it to me. regifting. So no receipt, no box so no way to return it or get any help I wouldnt even know how. I never go into Brookstone. Anyways I connect the device to my computer. For 5 seconds. And it auto disconnects. I went through all the links posted on this page and tried to download all the various software with no avail. I cant get it to stay connected long enough to open the software. The software will not open unless the device is connected. I try doing the speed thing connect the device, open the software and should I get that far the software gives me an error message saying the device is not connecting properly Shocker! and immediately after that the device disconnects and shuts down the software. I would like to use the device for pictures but I am about ready to throw it out the window and stomp on it. Anyone else have similar issues. For what it is worth Computer OS Windows 7 NOT a MacIt says on the box No Software plug and play. It also says Mac Compatible. I cant make it work. Tried every idea on this thread that seems to he been going on for 4 years now and its still not fixed. Would love any further assistance CiaranThe return policy is not acceptable. The pillows that they have in display at the store floor samples have been used so much that they dont represent the product you purchase in a box. The firmness is different.

After five emails, the item has been canceled by Brookstone and I will have to order it again. I was under the impression that customer service department was to help you and not fan the flames. Brookstone Customer Service employees are to simply push generic reply buttons and not even try to help with a problem. This is by far the most frustrating and worst online experience I have ever had. Do you have any other link to download the software Thank you Most of the software Im finding you have to pay for and am really not sure which one to use. Why should I have to pay for the software after she already purchased the product. I was surprised to see so many more complaints about the same product. I am very disapointed as I thought this was the neatest gift and was very excited to use it only to find out that I cant. Still need software compatible with iMac desktop. All links are not working. Would be so grateful if anyone has found a solution. When I found out that the new I pad two was coming out tomorrow I called Apple and ask them if I am able to return my I pad for the new I pad II and they said yes and not only that but they were also going to take back my travel case for the old I pad even though I didnt have an original box for it. I was so happy that my money wasnt in waste so then I called Brookstone asking the same question for the bluetooth keyboard case that I had paid 100 dollars for and the silicon case and they said that they will not return it with out the original box. Who saves the box for everything when you actually like the product. I dont live in a mansion. I think in special circumstances like this Brookstone should have somekind of plan to protect their customers purchases. I mean who will go there and buy their product. I am not ever going to buy any accessory from there any more cuz they sure dont care about their customers as long as they are fine.

Brookstone should realize that even though they are not losing money for this but in the future they are losing a customer who is able to purchase a lot more. Why waste your money. Go to apple store and buy your accessory from there cuz at least they care about their customer and are responsible for the products that they sell. I suggest Brookstone to do something about this kind of special

circumstances. I wonder if the president of Brookstone has boxes for all his purchases at home. OH maybe he doesnt cuz he doesnt buy anything from Brookstone. The device itself works, ie, revolves in a circular manner for one hour out of four. However, neither watch get wound one bit. I tried to return the device to a local Brookstone store who would not take it without the original packaging and would also not take it as a defective device, ie, does not do what it is advertised to do. I called their headquarters and was told the same thing. I believe I am being ripped off, as I believe many, many others are in this matter. Tracking said out for. The conditions in this video were the same.
