Find out more. All about cookies OK Carry on. When you buy a cordless phone it comes with a battery pack or 1.2V batteries specific to that model, so search by model to be sure you buy the correct BT cordless phone batteries that best suit your BT cordless telephone. Earlier BT phones came with NiCd Nickel Cadmium rechargeable batteries with lower capacities, these batteries have since been

replaced with the more environmentally friendly NiMH Nickel Metal Hydride rechargeable batteries which do not contain Cadmium. The added benefit of NiMH over NiCd is the capacity of the batteries being around double, giving you extra talk time and no physical change in the size of the battery. Think of the capacity as the amount of fuel the battery can hold. So, for example, if your old BT cordless telephone battery pack was a NiCd 3.6V 300mAh, its fine to replace this with the new NiMH 3.6V 600mAh battery pack. When a new battery is inserted in you BT phone for the first time, please refer to the instructions regarding its initial charging period this is usually something like 16 hours and is like a running in time for the new battery.

Mains power lead, phone cable and user guide included. Collection only. Limited is a credit broker, not a lender. Introductions are limited to motor London Place, London, SE1 2AF, UK. VAT No. 345 7692 64. This new interactive user guide lets you navigate easily through the pages and allows you to be directed straight to any websites or addresses that are referenced. Simply hover the cursor over the page number, website or reference and click when the hand icon changes to the icon. Call screening lets you hear callers leaving a message and pick up the call if you want. 100 Name and number phonebook to store all your contact numbers for easy dialling. Send and receive text messages. 1 Handsfree speaker. Speed dial assign a number stored in the Phonebook to a 29 keypad button for dialling with one touch. Quick access to a range of BT Services including directory enquiries and call divert. Caller Display lets you see who's calling and your phone stores details of the last 30 callers in a Calls list. 2 Register up to 5 handsets to the base without the need for additional telephone wiring. Digital call quality with a range of up to 300 metres outdoors and up to 50 metres indoors in ideal conditions. 1 You must subscribe to your network provider's Caller Display Service for text messaging to work and you must not withhold your telephone number. A quarterly fee may be payable. Some other network provider lines may not be compatible with this text messaging service. 2 You must subscribe to your network provider's Caller Display or Call Waiting service for these features to work. A quarterly fee may be payable. Before you make your first call you will need to set up your phone. Follow the simple instructions in Getting Started, on the next few pages. Our dedicated advisors are more likely to be able to help you than the retailer where you made your purchase.

Alternatively, you may find the answer in the Help section at the back of this guide or online at **IMPORTANT** Only use the telephone line cord supplied. Please note that this equipment is not designed for making emergency telephone calls when the power fails. Alternative arrangements should be made for access to emergency services. Mobile and International call costs may vary. Make sure it is at least 1 metre away from other electrical appliances to avoid interference. Your BT Granite works by sending radio signals between the handset and base. The strength of the signal depends on where you site the base. Putting it as high as possible ensures the best signal. Setting up **WARNING** Do not place your BT Granite in the bathroom or other humid areas. Handset range The BT Granite has a range of up to 300 metres outdoors when there is a clear line of sight between the base and handset. Any obstruction between the base and handset will reduce the range significantly. With the base indoors and handset either indoors or outdoors, the range will normally be up to 50 metres. Thick stone walls can severely affect the range. Signal strength The icon on your handset indicates when you are in range. If moving out of range of the base, the range indicator will flash. If you go out of range, any call you are on will be lost. **IMPORTANT** The base station must be plugged into the mains power socket at all times. Do not connect the telephone line until the handset is fully charged. Only use the power and telephone cables supplied with the product. 1. Plug the mains power adaptor item code into the socket marked on the underside of the base and plug the other end into the mains power wall socket and switch the power on. You can place the cable behind the retaining clip to prevent the plug being accidentally pulled from the socket. The base message counter lights up. The answering machine is switched on. Recharge the handset before you can use it again.

You also hear a low battery warning beep if the battery is low and needs recharging. During charging, the icon will scroll in the display. Battery performance In ideal conditions, a fully charged battery should give up to 10 hours talk time or 100 hours standby time on a single charge. Note that new batteries do not reach full capacity until they have been in normal use for several days. To keep the battery in the best condition, leave the handset off the base for a few hours at a time. Running the battery right down at least once a week will help it last as long as possible. Eventually they will need to be replaced. After charging your handset for the first time, subsequent charging time is about 6-8 hours a day. Batteries and handset may become warm during charging. This is normal. Using your BT Granite on a Broadband line. If this product is to be used on a broadband line then you must ensure that it is connected via an ADSL microfilter. Using this product on a Broadband line without an ADSL microfilter may cause problems with this product and your Broadband service. Additional BT ADSL microfilters can be purchased from 2. Insert battery as shown below. Make sure the coloured wires line up as shown on the label inside the handset and the connector is plugged fully into the socket. Note If you ever need to remove the battery, simply slide open the battery compartment cover and unplug the battery pack from the socket. 3. Attach the desk mounting plinth. This is an optional attachment, the base can be placed flat on the desk without the plinth if desired. Place the handset on the base to charge for at least 24 hours. When the handset is fully charged the icon will be displayed. 5. When the battery is fully charged, plug one end of the telephone line cord into the socket marked on the rear of the base and the other end into the telephone wall socket. For each additional handset and charger 1.

Insert the power adaptor with the red connector item code into the underside of the charger. Plug the other end into the mains wall power socket and switch on. 2. Insert the battery in the handset as shown on the previous page and put the battery compartment cover into place. 3. Attach the desk mounting plinth optional in the same way as shown on previous page. 4. Charge the handset for at least 24 hours. When the handset is fully charged the icon will be displayed. Any additional handsets supplied as part of a multipack are preregistered to the base so, once charged, are ready for use. The handset number is shown in the display. Automatic date and time setting Providing you have subscribed to your network's Caller Display service, the date and time is set automatically for all handsets when you receive your first call. The date and time is recorded with each answering machine message you receive. If you do not have a Caller Display service you can set the date and time manually. You can also change the date format to present the day or the month first, see page 27. Multihandsets When setting the time and date on one handset, any other handsets registered to the base are also updated automatically. If the time or date format is adjusted then only the handset being used will be updated, all others will need to be changed independently if required. Press Select. The current date and time setting is displayed. 3. Use the keypad to enter the correct time and date. Press OK to confirm. 4. Press until you return to standby. Your BT Granite is ready for use. In a menu, press to scroll up through the options. During a call, press to increase the volume. During a call, press to put caller on hold, page 52. Press UP or DOWN to scroll through the available options. 3. Press Select to select a menu option or Back to return to the previous screen. 4. To exit a menu and return to standby, press. Option buttons Press to select the option displayed on screen. Phonebook Handset settings Base settings Clock and Alarm Advanced Set Network Service Text Message Answer Machine To switch on 1. Press and hold until the handset switches on. Make an external call 1. Press. 2. When you hear the dial tone, dial the number. When you make a call, the In use light on the base flashes. Call timer Your handset will automatically time the duration of all external calls.

The handset display shows the call duration both during and for a few seconds after your call. Out of range warning When the handset goes out of range of the base, flashes. If you are on a call, the line will hang up. Move back within in range. The handset will automatically reconnect to the base. Preparatory dialling 1. Dial the number first. If you make a mistake press Clear to delete the last digit. 2. Press to dial. End a call 1. Press. Press and hold Clear to delete the whole number and return to standby. Press Save to add the number to the Phonebook, see page 19. Options during a call 1. During a call, press Options to open the incall menu. 2. Scroll and between the two options Phonebook or Start 2nd Call Open the Phonebook during a call 1. During a call, you can check entries in the Phonebook. Press options then select phonebook. 2. Scroll or to the entry you want. 3. Press SELECT to see the number. 4. Press Back to return to the previous menu level. If you do not have a Caller Display service, the screen shows External call. Auto answer As long as you have auto answer set to ON you can answer a call by lifting the handset off the base. If you have switched auto answer off, you will need to press as well. Auto answer ON is the default setting. See page Press to answer the call. Or lift the handset off the base or charger. There are 5 levels. 1. Press or to increase or decrease the volume. Mute Secrecy During a call, you can talk to someone nearby without your caller hearing. 1. Press Mute. Your caller cannot hear you. 2. Press Unmute to return to your caller. During a handsfree call, press or to change the volume. Handsfree Handsfree lets you talk to your caller without holding the handset. It also enables other people in the room to listen to your conversation over the loudspeaker. Make a handsfree call 1. Dial the number then press twice. You hear your call over the handset loudspeaker.

Press again to switch the call between the loudspeaker and the earpiece. Switch to handsfree during a call 1. During a call press to put the call on the loudspeaker. To switch handsfree off and return the call to the earpiece, press again. Redial Up to the last 20 telephone numbers called are saved in the redial list. You can then select any of the numbers to redial, delete or copy to the phonebook. Redial the last number called 1. Press the last number you called is displayed. 2. Press to dial. Redial a number from the redial list 1. Press, the last number you called is displayed. 2. Press or to scroll to the number you want. 3. Press to dial. Save a number from the redial list to the Phonebook 1. Press then scroll to the number you want. 2. Press select to select the number, then press menu to enter the sub menu. If you make a mistake, press Clear. For tips on entering names and text, see page Press OK. The number is displayed. Press OK to save. 5. Choose the required melody, press SELECT and the entry is saved to the phonebook. 6. Press to return to the previous menu level. Delete entire redial list 1. Press. 2. Press select on any entry, then press menu and scroll to Delete all and press select. Keypad lock WARNING If the keypad is locked you will be able to dial the emergency numbers

999 and 112. When the keypad is locked you can still answer incoming calls and operate the handset as normal. When the call is ended, the keypad lock comes on again. Paging calls only ring the handsets, they cannot be answered as a voice call. Press SILENT to stop a particular handset ringing. Other handsets will still ring if you have multiple handsets so this could help you find it. To lock the keypad 1. Press and hold until the display shows Keypad locked. To unlock the keypad 2. Press and hold to unlock the keypad. Find handset Paging You can ring a handset to help locate it. 1. Press on the base. All handsets registered to the base will ring.

The display shows paging and the icon flashes. 2. Press on the base again to stop the ringing or press any button on any handset. Names can be up to 14 characters long and numbers up to 24 digits.
